## Company

### VISION

Absolute was founded on the principle that it takes more than repair capability to offer value. It takes:

- **PASSION**

Our passion demands that we offer product improvement solutions, not just component repair.

- **COMMITMENT**

Our commitment to our customers drives our analysis and repair improvement process.

- **COLLABORATION**

Our collaboration with customers provides cost control and reliability solutions better matched to each aircraft operator's most demanding needs.

These attributes, along with our conviction that integrity is what drives our business, allow Absolute Aviation to remain the industry leader offering product improvement and repair solutions second to none.

### TRUST

Prior to starting Absolute Aviation, our founders earned the highest reputations for integrity and ingenuity in the commercial aerospace community. In addition, they have been recognized for their expansive expertise having worked for several aerospace companies including General Dynamics and Eastern Airlines.

From engineering to economics and beyond, our team has the experience with airline operational conditions needed to effectively collaborate with customers and create meaningful product improvement solutions. We are ready to support the requirements of our customers; a few of whom include:

- Delta Airlines
- American Airlines
- United Airlines
- British Airways
- Lufthansa
- United Parcel Service
- American Eagle
- Alaska/ Horizon

## **M A N A G E M E N T**

At Absolute Aviation, responsibility starts with its leadership. Absolute Aviation's leadership teams are all highly qualified, experienced professionals who have mastered combining vast knowledge and experience with attention to detail.

The employment standards at Absolute Aviation are among the highest in the industry. Every technical professional must pass the most rigorous testing and screening process in commercial aviation, demonstrating superior knowledge, aptitude and grasp of theory. Each member on the repair team is a skilled expert working collaboratively to evaluate and improve the components we repair.
