Repair Improvements

Offering much more than just standard component repair and overhaul, Absolute's highly skilled avionics experts use Design Analysis to continually evaluate repairable and rotatable aircraft components for improvement.

Every Component, Every Time

- Identifying Cause of Failure
- Reviewing Complete Repair History
- Evaluating Subcomponent Cost
- Tracking Reliability

Dedicated to product improvement, Absolute Aviation applies Value Added Engineering Procedures to every aircraft component repair. A broad engineering capability allows Absolute Aviation to create the best component repair solution for each airline application.

Our value added engineering includes:

- Precautionary Improvements
- Preventative Changes
- DER Approved Engineered Repairs
- STC/PMA Engineered Solutions

Each Absolute Aviation component repair specialist works in concert with an engineering team providing in-house design improvement services, giving us a repair capability that is second to none.

- No Cost Research and Development
- Collaborative Engineering
- Improved Component Design and Repair
- Reliability Tracking and Analysis

Absolute Aviation has earned a respected reputation for the ability to effectively analyze and identify aircraft component design flaws and engineer effective cost saving repair solutions.
